

Peace of mind for you
and your family

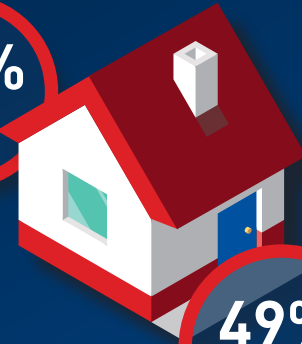

Don't become another crime statistic!

Official data from Scotland Yard indicates only 5% of burglaries are solved.

It's important to know you will return to find your home just as you left it, and that's why it's vital to make sure your external doors are well protected.

90% of burglars gain entry through the front or back door, so fit Breaksecure 3DS to ensure you don't become the next crime statistic!

Current data
from the Office for
National Statistics

REMEMBER...

- > After a burglary you're unlikely to get your items back
- > Some possessions are irreplaceable – don't risk it!
- > Burglary for theft of vehicle keys is at an all-time high
- > Insurance premiums are likely to increase after a break-in

ASK YOURSELF...

- > Does your door lock comply with the latest home insurance standards?
- > Do you know who has a key to your front door?
- > Do you know how many keys have already been cut for your front door?

BREAKSECURE
3DS
ULTIMATE DEFENCE

Mul-T-Lock, Portobello Works, School Street
Willenhall, West Midlands WV13 3PW

www.mul-t-lock.co.uk

Secured by Design

Police Preferred Specification

Excellence as standard

As well as complying to the British Standard Kitemark BS EN 1303:2015 and TS007 3*, the Breaksecure 3DS cylinder has also undergone rigorous independent testing by the Master Locksmiths Association to meet the Sold Secure SS312 Diamond Standard – offering the very best protection in lock security.

Secured by Design

Police Preferred Specification

Recommended by the police

Having been tested to BS EN 1303:2015, TS007 3* and SS312 Diamond Standard, the Breaksecure 3DS is also endorsed by Secure by Design, the police preferred specification. Helping to protect your home and belongings.

**DON'T BE
A VICTIM**

LOCK SNAPPING

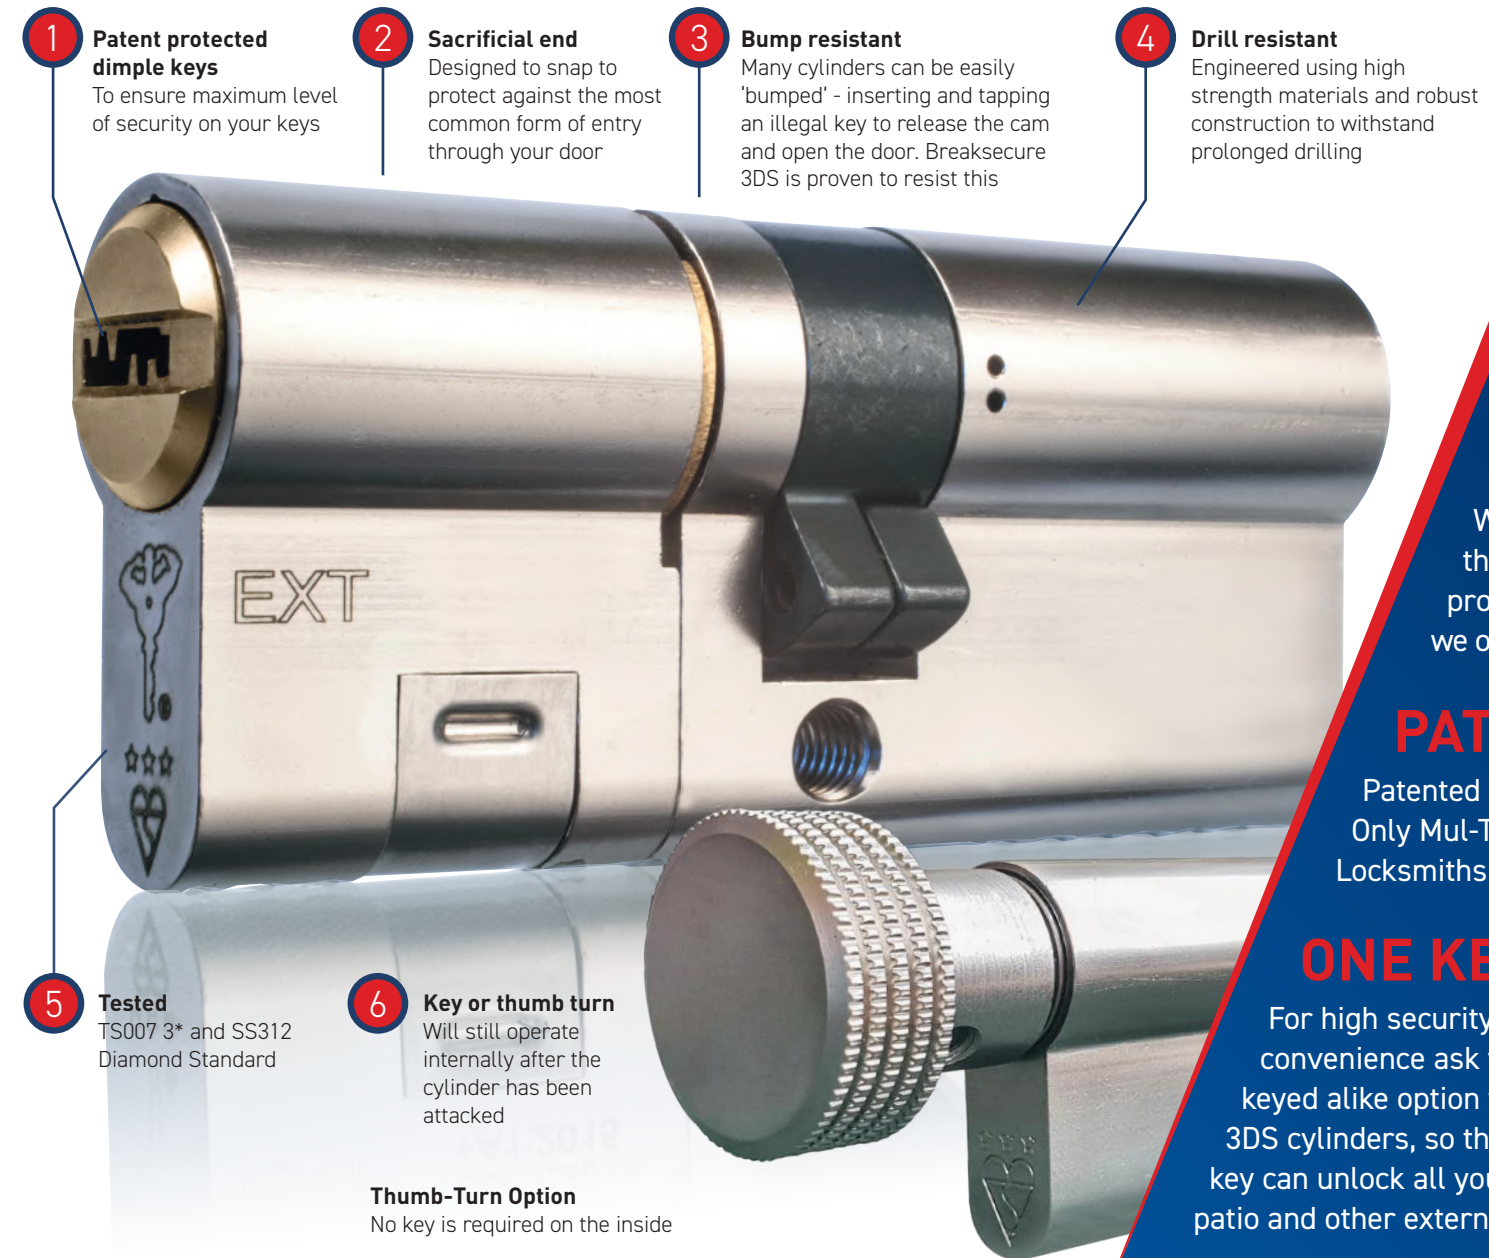

Lock snapping is a method of entry where burglars apply force to the lock cylinder, rendering the lock useless. The locks most at risk of this type of attack are fitted with a euro profile cylinder, which are found in the majority of PVC and composite doors installed in the last 15 years and operate in combination with a multipoint lock.

3DS - WHY YOU'LL LOVE IT... AND WHY BURGLARS HATE IT

- Separate lines of defence to deter even the most determined attack
- Snap-off front section, which will come away if attacked to give the intruder less of the cylinder to grasp
- Patent protected dimple keys to ensure maximum level of security
- Anti-drill, anti-screw, anti-bump and anti-pick protection

ULTIMATE DEFENCE

1 Patent protected dimple keys
To ensure maximum level of security on your keys

2 Sacrificial end
Designed to snap to protect against the most common form of entry through your door

3 Bump resistant
Many cylinders can be easily 'bumped' - inserting and tapping an illegal key to release the cam and open the door. Breaksecure 3DS is proven to resist this

4 Drill resistant
Engineered using high strength materials and robust construction to withstand prolonged drilling

5 Tested
TS007 3* and SS312 Diamond Standard

6 Key or thumb turn
Will still operate internally after the cylinder has been attacked

Thumb-Turn Option
No key is required on the inside

BREAKSECURE 3DS

EASY TO FIT

All you need is the correct size lock and a screwdriver!

Simply unscrew your interior handles, push the old lock out and put the new one in.

GUARANTEED

We are so confident that the 3DS will offer maximum protection to your home that we offer a full ten-year guarantee.

PATENTED KEY

Patented key for extra protection. Only Mul-T-Lock Approved Locksmiths can cut.

ONE KEY HOUSE

For high security with the ultimate convenience ask your locksmith about a keyed alike option for your Breaksecure 3DS cylinders, so that one patented key can unlock all your front, back, patio and other external doors.
