ACO Kerbs

For external and internal walls

THE HYGIENIC WALL
PROTECTION SOLUTION
FOR THE FOOD INDUSTRY

ACO HYGIENIC WALL PROTECTION SOLUTION FOR THE FOOD INDUSTRY

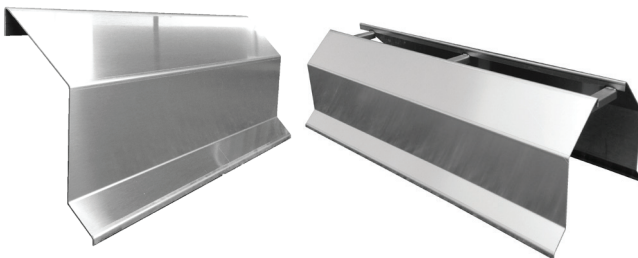

ACO is a world leading manufacturer of stainless steel drainage and recently introduced the

Hygiene**First**

concept to address concerns in the food industry about pathogens lying dormant in the drains that can find its way back in the food processing area (e.g. through incorrect cleaning practices).

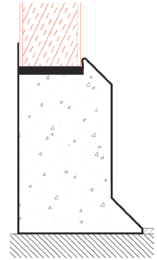

ACO is extending its range with stainless steel hygienic wall protection products. ACO is applying the manufacturing techniques learnt from Hygienic Design practices in drains on the kerbs that are protecting the walls.

Although ACO has a standard wall kerb design (see box) with flexibility in dimensions to suit the application or to connect with existing kerbs, through the ACO Engineered Solution we can offer design facility to create product compliant to the wishes of the customer.

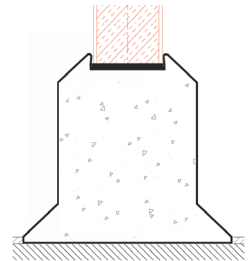

The standard products:

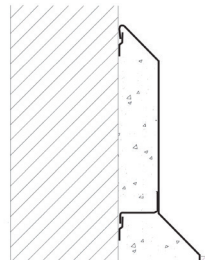

Internal walls single sided:

Internal wall double sided:

External wall clip on:

Technical specification:

- 2 mm stainless steel
- available in Grade 304 or 316 stainless

If you would like to discuss the Engineered Solution offered by ACO please call our Design Services team on 01462 810 431
