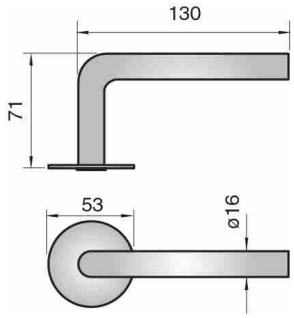
951501 lever handle

L-shape lever, 16mm diameter tubular stainless steel, grade 316L. Unsprung. Bolt-through fixing. Roses are prepared with 30mm fixing centres for use with ASSA Connect and Modular lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.

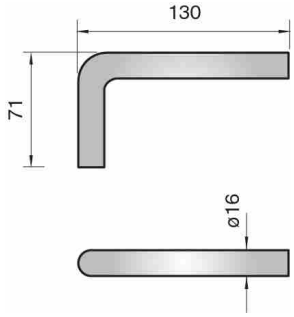


951502 lever handle

L-shape lever, 16mm diameter tubular stainless steel, grade 316L.

Unsprung. For use with backplates. Supplied with spindle suitable for door thickness 32-60mm.

Suitable for general and heavy use.

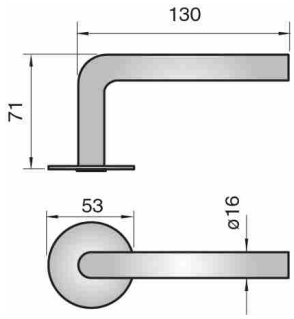


951503 lever handle

L-shape lever, 16mm diameter tubular stainless steel, grade 316L. Unsprung.

Bolt-through fixing. Roses are prepared with 38mm fixing centres for use with Euro / DIN type lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.



Door Furniture

Unsprung lever handles D16 / Ruko-Line

Application

Unsprung handles of grade 316L stainless steel with needle bearings and safety return. For general and heavy use. Ideal for areas where hygiene is a priority and for external use in harsh or corrosive environments. Suitable for ASSA and most other makes of lockcase.

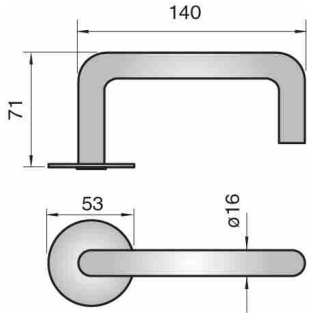
For door thickness guide, finishes and lockcase compatibility chart see Door Furniture Information appendix.

951504 lever handle

U-shape lever, 16mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return. Bolt-through fixing. Roses are prepared with 30mm fixing centres for use with ASSA Connect and Modular lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.

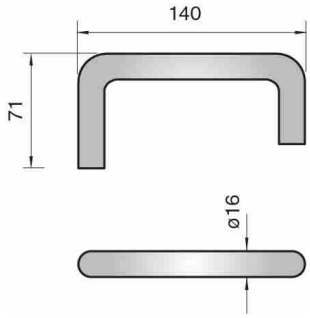


951505 lever handle

U-shape lever, 16mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return. For use with backplates. Supplied with spindle suitable for door thickness 32-60mm.

Suitable for general and heavy use.

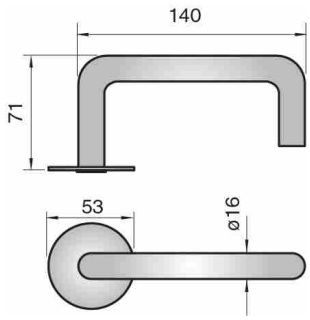


951506 lever handle

U-shape lever, 16mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return. Bolt-through fixing. Roses are prepared with 38mm fixing centres for use with Euro / DIN type lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.



Door Furniture

Unsprung lever handles L19 / Ruko-Line

Application

Unsprung handles of grade 316L stainless steel with needle bearings. For general and heavy use. Ideal for areas where hygiene is a priority and for external use in harsh or corrosive environments. Suitable for ASSA and most other makes of lockcase.

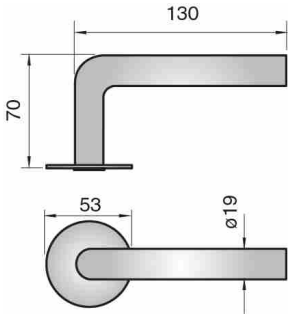
For door thickness guide, finishes and lockcase compatibility chart see Door Furniture Information appendix.

951507 lever handle

L-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

Bolt-through fixing. Roses are prepared with 30mm fixing centres for use with ASSA Connect and Modular lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.

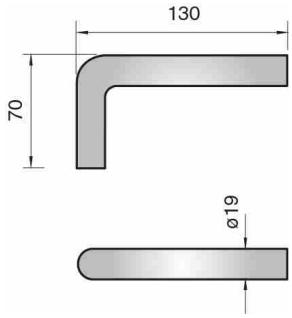


951508 lever handle

L-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

For use with backplates. Supplied with spindle suitable for door thickness 32-60mm.

Suitable for general and heavy use.

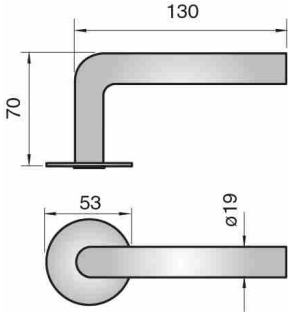


951509 lever handle

L-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

Bolt-through fixing. Roses are prepared with 38mm fixing centres for use with Euro / DIN type lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.



Door Furniture

Unsprung lever handles D19 / Ruko-Line

Application

Unsprung handles of grade 316L stainless steel with needle bearings and safety return. For general and heavy use. Ideal for areas where hygiene is a priority and for external use in harsh or corrosive environments. Suitable for ASSA and most other makes of lockcase.

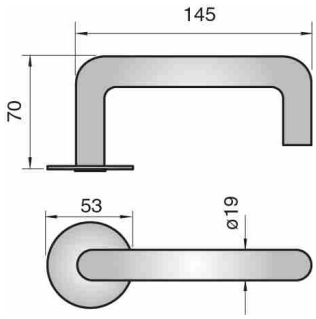
For door thickness guide, finishes and lockcase compatibility chart see Door Furniture Information appendix.

951510 lever handle

U-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return, as recommended by BS 8300 for use by disabled people. Bolt-through fixing. Roses are prepared with 30mm fixing centres for use with ASSA Connect and Modular lockcases.

Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm. Suitable for general and heavy use.

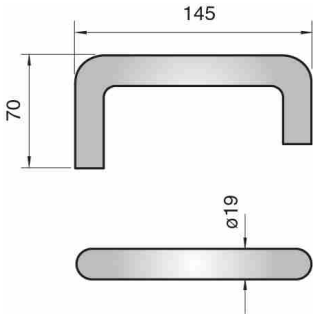


951511 lever handle

U-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return, as recommended by BS 8300 for use by disabled people. For use with backplates. Supplied with spindle suitable for door thickness 32-60mm.

Suitable for general and heavy use.

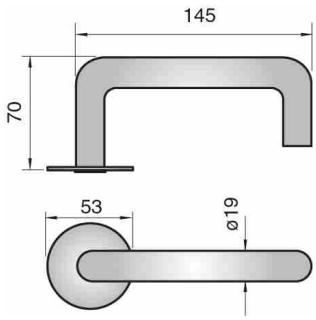


951512 lever handle

U-shape lever, 19mm diameter tubular stainless steel, grade 316L. Unsprung.

Features safety return, as recommended by BS 8300 for use by disabled people. Bolt-through fixing. Roses are prepared with 38mm fixing centres for use with Euro / DIN type lockcases. Supplied with spindle and M4 fixing screws suitable for door thickness 32-60mm.

Suitable for general and heavy use.



Door Furniture

Unsprung lever handles / Ruko-Line

Application

Unsprung handles of grade 316L stainless steel with needle bearings. For general and heavy use. Ideal for areas where hygiene is a priority and for external use in harsh or corrosive environments. Suitable for ASSA and most other makes of lockcase.

Door Furniture

Clutch thumbturns / Miscellaneous and accessories

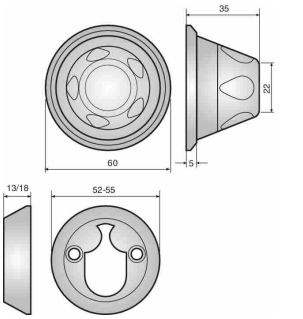
Application

Designed for use on individual bedrooms or bathrooms within mental health secure accommodation, young offenders units, etc. Permit clients to lock the door for privacy, while allowing authorised staff to gain entry. Avoids the problem with conventional thumbturns where clients can prevent the door being unlocked by gripping the internal turn.

Available in satin chrome finish.

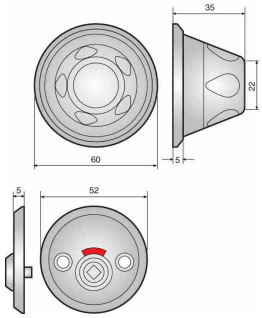
DC256 clutch thumbturn

Clutch thumbturn. Includes cylinder ring supplied in two sizes, 13mm and 18mm. Rounded design to minimise risk of injury and prevent the attachment of ligatures. May be used to operate the lock normally. However, if the thumbturn is gripped to prevent the door being unlocked, the internal sprung clutch mechanism will release allowing a key to turn in the cylinder and operate the lock.



DC265 clutch thumbturn toilet version

Clutch thumbturn for use on bathroom doors. Includes external red/white indicator with emergency device. Rounded design to minimise risk of injury and prevent the attachment of ligatures. May be used to operate the lock normally. However, if the thumbturn is gripped to prevent the door being unlocked, the internal sprung clutch mechanism will release allowing the door to be opened from outside using an emergency key (supplied separately).



Clutch thumbturns

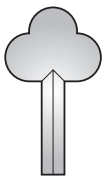
DC256 clutch thumbturn

Used with	Exterior		Interior
310 313 765 766	Key operates deadbolt and latchbolt. Lever handle retracts latchbolt. Holding the internal turn does not prevent the door being opened.		Turn operates deadbolt. Lever handle or knob retracts latchbolt.
311 2788 2587	Key operates deadbolt. Holding the internal turn does not prevent the door being opened.		Turn operates deadbolt.

For use with ASSA Connect lockcases 310, 311 and 313, and ASSA Modular lockcases 765, 766, 2587 and 2788. Requires internal cylinder (R503, FP503, 4803, C5803, 4403) fitted externally, allowing the lock to be dismantled from outside in case of emergency. If used with 5-pin or Flexcore cylinders 43mm cylinder screws should be specified separately.

DC265 clutch thumbturn – toilet version

Used with	Exterior		Interior
310 313 765 766	Indicator rose with emergency device. Lever handle retracts latchbolt only. Holding the internal turn does not prevent the door being opened.		Turn operates deadbolt. Lever handle or knob retracts latchbolt.
311 2788 2587	Indicator rose with emergency device. Holding the internal turn does not prevent the door being opened.		Turn operates deadbolt.



Emergency key

For use with ASSA Connect lockcases 310, 311 and 313, and ASSA Modular lockcases 765, 766, 2587 and 2788.

* Connect/Modular accessories include the Classic 18256, 2356 and 2256 and their equivalents in other ranges.
** The 6640 and 6696 lever handles feature very heavy springing; caution should be used when specifying these products with the Modular lockcase range which also features heavy-duty springing, as the combination may be difficult to operate by some elderly or infirm people.

Finishes

In the increasingly polluted atmosphere in which we live, the demands on products to resist corrosion are particularly high. ASSA products have the benefit of the latest automatic plating equipment which incorporates the best of modern plating processes. Satin chrome and stainless steel give extremely good weather resistance, whilst polished brass is offered as a decorative finish. In addition, our products are suitable for powder coating or plating for occasions when it is important to match the finish of other ironmongery on a project.

LRV was measured using lever handles of the appropriate finish.

Anti-microbial coatings

Restricting the spread of bacteria and other dangerous organisms is a matter of vital concern in this era of antibiotic resistant 'superbugs' such as MRSA. We have therefore developed a range of anti-microbial finishes for several of our products. These will be particularly useful in applications vulnerable to contamination such as hospitals, schools, leisure facilities, and any buildings with toilets or food preparation areas, especially those used by people with reduced resistance to infection such as the sick, children or the elderly.

How it works

The anti-bacterial effect is produced by a surface treatment applied to the product which contains small quantities of silver. Silver ions are released onto the surface of the product in a steady and controlled manner over the lifetime of the finish.
The silver ions then counteract bacteria in three ways: by preventing transport functions through their cell membranes, inhibiting cell division, and disrupting the cell metabolism.

Key features

- Safe for use in medical and food preparation areas.
- In independent testing, the process destroyed 99.99% of bacteria and moulds exposed to it over a 24-hour period.
- Tested to work against dangerous organisms such as E. coli, Staphylococcus, Listeria, Legionella and Salmonella.
- The coating is an integral part of the product which does not wear off in normal use, and continues to be effective throughout its lifetime.
- Products should still be cleaned in the normal way as part of a regular hygiene routine. Please note that extensive scratching or abrasion can limit the effectiveness of the anti-microbial coating.
- The TAM coating is currently offered on the Aluminium 1325 lever handle, and the Addion finish – which is of architectural quality and resembles satin stainless steel – on the Distinction 6655 and 6655C lever handles.

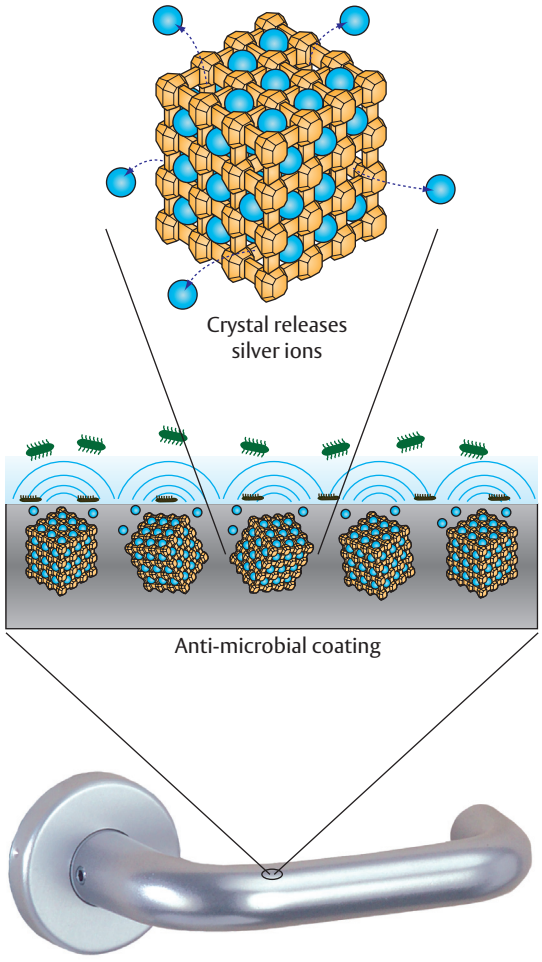

Diagram illustrates TAM coating on aluminium handles.

Door Furniture Information

Dimensions

ASSA Door Furniture sets are supplied as standard for 44/45mm thick doors. However, we also offer a complete range of alternative components. Using these, the products may be adapted to suit doors of different thicknesses.

Cylinder Ring Size (Modular and Small Case Locks):
Face of the cylinder will be 40.25mm from the centreline of the door (34.75mm for 5-pin Cylinders).
Subtract half the door thickness (A) from this measurement to identify the correct cylinder ring size.
Scandinavian Oval cylinders must not project more than 2mm from the face of the cylinder ring, for security reasons. This is less crucial on Scandinavian Round cylinders because of their cover sleeve.

EXAMPLE: Fitting a 4800, ASSA Twin Combi or dp Scandinavian Oval cylinder to 44mm thick doors (A = 22mm), use 18mm cylinder ring. (40.25mm – 22mm = 18mm).

Handle Fixings Size (Using ASSA Lever Handles):
Spindle length should be the door thickness plus not less than 50mm.
Split Spindles should be half the door thickness plus not less than 10mm.
Screws should be the door thickness plus approximately 10mm.
