#### Introduction

Armourplan G membrane is a glass tissue reinforced PVC membrane for detailing on Armourplan roof systems. The glass tissue reinforcement offers excellent dimensional stability and flexibility allowing the material to be formed easily into intricate details ensuring the roof installation is fully waterproofed. Armourplan Detailing Membrane is adhered to suitable detailing surfaces using Armourplan PVC Contact Adhesive or Sprayfast PCA adhesive. All overlaps and joints with are heated welded using suitable hot-air welding equipment.

Armourplan G membrane can be used to waterproof the joints between Armourplan membrane coated metal flashing sections and gutter joints or used to form complex details such as pipe penetrations or external corners. Armourplan G membrane can also be used to form adhered upstands.

#### Features & Benefits

- Excellent flexibility for complex detailing
- Good UV resistance and durability
- Good mechanical properties and product performance
- Efficient and safe installation
