Foundation Series Sanitaryware

For more information go to www.barbourproductsearch.info

Foundation Series Sanitaryware

Designed specifically to deliver quality products at competitive prices. Our bathroom suites offer modern sleek design and total room solutions. All our sanitaryware, taps and showers are tested to the stringent standards of the Water Regulatory Association (W.R.A.S) and the Water Regulators Council (W.R.C.). These test procedures ensure only quality product is delivered to our customers.

The Foundation Series of sanitaryware featured within this brochure is just a selection of bathrooms the N&C Group offer, providing solutions to current market requirements. Our portfolio of products include solutions dedicated to water conservation, which are ideally suited to sustainable homes. Ecoflow cartridges to taps and mixers, reduced water consumption on toilets, and reduced capacity bath tubs to name just a few.

N&C

The Nicholls and Clarke Group of Companies is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the Capitals building trades to becoming the largest privately owned national manufacturer and distributor of fine quality tiles, bathrooms and related products.

Quality manufacturing is at the core of our business. We own five state of the art manufacturing facilities based in both the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product more specialised than that of any of our competitors. Our sixteen distribution centres are strategically placed to provide full coverage within all areas of the United Kingdom. This distribution network is further supported with our private fleet of over 100 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a nationwide delivery service be that to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.
