FLEXIBLE & FUTUREPROOF

Nook is a family of personal & social spaces designed for wellness and productivity.

Our products were founded on the principals of wellness and neurodiversity in the workspace. People are naturally "wired" differently and thus need alternative environments for thinking and learning.

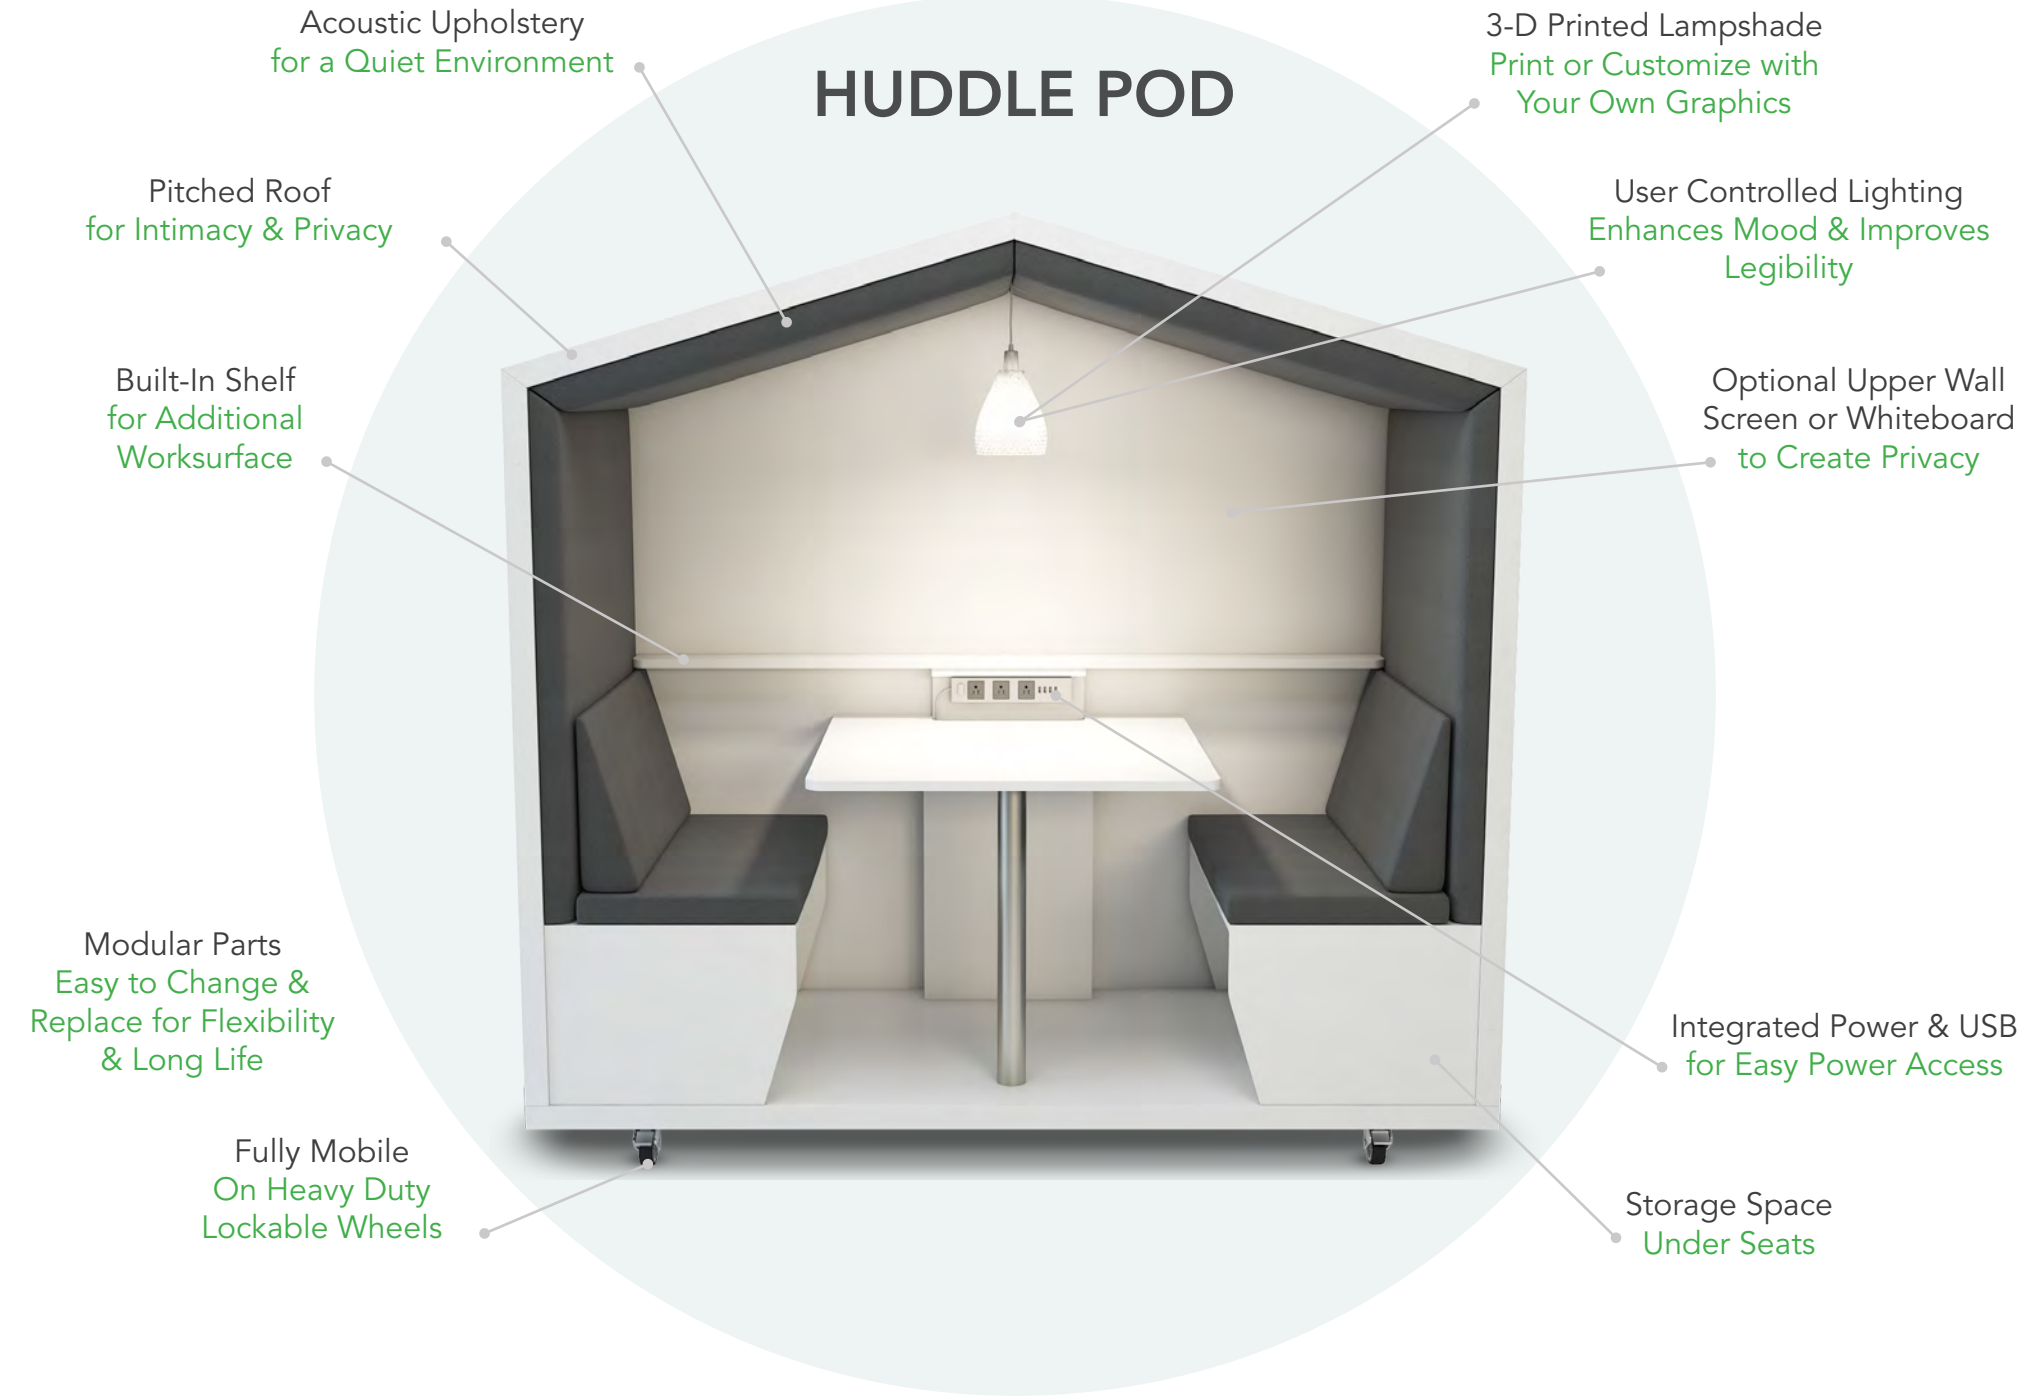

As Nook evolved, it also became relevant in the work environment as an agile system built for change.

Nook Pods are mobile, adaptable, privacy pods that create space flexibility as buildings struggle with density issues and compete for small meeting spaces.

Huddle and Shelter Pods cultivate engagement and collaboration as offices become Employee Engagement Centers (EEC).

Solo Pods create personal space for individual work or video calls. They improve productivity while blocking out disruptive noise.

Nook provides shelter without confinement.

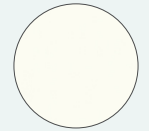

“ Our Nooks are in constant use. They solved an office space problem for us instantly. ”

-Hellen Engel, Adidas

SENSORY, WELLNESS & EDUCATION

Now more than ever, the workspace needs to cater to all brain types and provide spaces for rejuvenation.

“ All schools should have one of these, and I am going to grovel with both of the special needs schools that my children attend and see if we can fund-raise for one, now having witnessed how instantly helpful they are! ”

-Michaela White - Mother of child with autism.

Novotel Amsterdam

Customize with your own materials

Nook Home Solo and Nook Home Huddle are new elements supporting distributed workplace, work from home, teleworking and remote work.

“ Our tenants love the Nook Pods and now some of them own their own Nooks too. ”

-Bristol Science Park Director, Tom Beasley
