

## Bushboard's New Cubicles are the Preferred Choice for Installers

When Bushboard Washrooms were deciding who should be entrusted with the installation of their prestigious new washroom ranges on a recent photo shoot, Sparta Developments were the obvious choice.

As part of Bushboard's Preferred Installer Scheme, Sparta had ample knowledge of the existing product range. This, coupled with their unrivalled experience and dedication to

quality, gave Bushboard the assurance that the final product would be picture perfect!

The newly revamped Aero and Paraline ranges aim to deliver the perfect balance of quality and value meeting the ever-growing demand for executive washrooms without the executive price tag.

Through clever design, the Bushboard product development team has been able to deliver the ultimate in design and durability whilst offering greater value for money than ever before.

The new products have been a hit with Sparta's installers, not only for the quality of design, but also for the ease of installation. 'Bushboard's products have always been easy to install and the new products are no exception,' commented Matthew Fuller, a joiner at Sparta Developments.

'I have to agree with Matthew,' added Darren Clifford, also a joiner at Sparta. 'Not only are they simple to install and a great time saver, the new designs look and feel fantastic!'
